

The following bibliography is a list of peer-reviewed publications that relate to the clinical utilization of nerve allografts and/or Avance Nerve Graft®, Axoguard Nerve Connector®, Axoguard Nerve Protector®, and Axoguard Nerve Cap® for the repair of peripheral nerve injuries. It is not intended to be a comprehensive bibliography of all available publications on this subject; rather it is intended to be a snapshot of the biomedical literature available through PubMed and Google Scholar as well as known journals and textbooks not currently indexed on the PubMed database.

To the best of our knowledge this bibliography represents the full compendium of literature available on Axogen technologies. For questions related to any of the literature listed, please contact Axogen Medical Affairs at MedicalAffairs@axogeninc.com.

INDICATIONS FOR USE

Avance Nerve Graft is processed nerve allograft (human) intended for the surgical repair of peripheral nerve discontinuities to support regeneration across the defect.

Axoguard Nerve Connector is indicated for the repair of peripheral nerve discontinuities where gap closure can be achieved by flexion of the extremity. The Axoguard Nerve Connector is supplied sterile and is intended for single use.

Axogen Comprehensive Clinical Bibliography

Axoguard Nerve Protector is indicated for the repair of peripheral nerve injuries where there is no gap. The Axoguard Nerve Protector is supplied sterile and is intended for single use.

Axoguard Nerve Cap is indicated to protect a peripheral nerve end and to separate the nerve from the surrounding environment to reduce the development of symptomatic or painful neuroma.
